MDM 16 8.2MHz Security Tag system by Sidep

Description:

The MDM series Security tag system is specially suited for small to medium business and is an ideal solution to protect narrow or wide exits limiting the number of systems installed.

Highly accurate this system provides efficient detection on both sides of the pedestal using Hard tags, EAS labels and source tagged products.

Thanks to its auto adjusting Digital Processor known as DSP, this system requires limited maintenance and servicing. The MDM can be installed and adjusted without professional supervision making this system suitable for D.I.Y installations

Features:

- Robust steel tubular design
- Finished in polished Chrome
- Operates at 8.2MHz (Retail Standard)
- Tag detection on both sides up to 1 meter
- Latest DSP processor technology
- Low Voltage 16VAC
- 160x38x3.2cm

Benefits:

- Visual deterrent against shoplifters
- Eliminates need for door staff or security guards
- Compatible with all major brand 8.2MHz tags
- Low Voltage design for easy D.I.Y installation
- Alarm and flashing Light to alert staff
