

Wireless People Counter (Basic)

Battery Operated people counter with Integrated RF Transmitter

Description:

The WPC Wireless People Counter is a battery operated infra-red beam counter with an in-built radio transmitter. The unit consists of two parts; the IR transmitter and the IR receiver. The IR receiver has an integrated 6-digit LCD counter and a radio transmitter for truly wireless installation and operation. The unit can operate across a distance of up to 6 meters in low power mode and 10 meters in high power mode. The user can select the power mode. The counter can operate in almost any environment without interference from ambient lighting.

The WPC Wireless people counter is designed for long battery life; the internal 3.6 Volt Lithium battery will operate the receiver for up to 3 years in normal operation. The transmitter can operate on a single 3.6 Volt Lithium battery for 1 year in low power mode.

Features:

- Battery operated for simple installation
- Integrated 6-digit LCD screen
- Suitable for up to 10 meter opening - 6 meters in low power mode
- Up to 50 meters. radio range in typical Retail Environment (for use with WPC Manager)
