

M.D.M Mono-system 8.2 Mhz

Specially suited for hyper and supermarket usage SIDE P's Transceiver system is an ideal solution to protect wide exits limiting the number of systems installed or in cashier line configuration in supermarket.

Highly accurate this Mono System provides an efficient detection on both sides of the pedestal with hard tags, EAS labels and source tagged products.

Thanks to its Auto-Adjusting Digital Processor (DSP), this Mono System requires limited maintenance service and can be installed and adjusted without professional supervision.

Complete System includes: 1 transceiver antenna and 1 power supply.

Specifications:

MDM 17 :

Height 170.0 cm
Width 38.90 cm
Depth 3.20 cm
Base: 37.0x6.0 cm

MDM 14 :

Height 140.0 cm
Width 38.90 cm
Depth 3.20 cm
Base : 37.0 x 6.0 cm

Detection Area on each side of pedestats
MDM 14 = 2 x 70/90 cm
MDM 17 = 2 x 85/115/160 cm
